

IMAGE Final Conference

Novel approaches for Geothermal Exploration

October 4 – 6, 2017
Akureyri, Iceland

IMAGE final conference, Novel approaches for Geothermal Exploration marks the end of a four years long project on exploration and assessment of geothermal reservoirs. Presentations from related topics and projects are invited. A total of six sessions will be held and one poster session.

- EM/MT
- Geochemistry (incl. geothermometers and tracers)
- Geophysics (incl. active and passive seismics, and downhole methods e.g. VSP)
- Modelling (incl. mechanical, reservoir and temperature models, and stress-fields)
- Reykjanes
- Structural geology

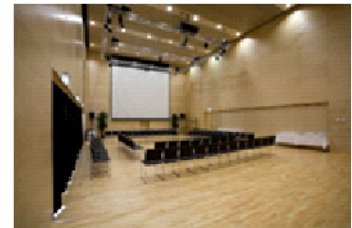

Preliminary Agenda

- Sunday, Oct. 1st:
08.30 am - 13.30 pm Optional excursion to the Reykjanes high-temperature area, its power plant and the drillsite of the IDDP-2, the deepest well in Iceland.
- Wednesday, Oct. 4th: IMAGE Final Conference. Novel approaches for Geothermal Exploration
- Thursday, Oct. 5th: IMAGE Final Conference. Novel approaches for Geothermal Exploration
- Friday, Oct. 6th:
8 am - 17 pm Optional excursion to experience the abundant geothermal activity in the North of Iceland, the new geothermal power plant at peistareykir and the Krafla high-temperature area. The unique nature around Lake Mývatn will be visited as well.

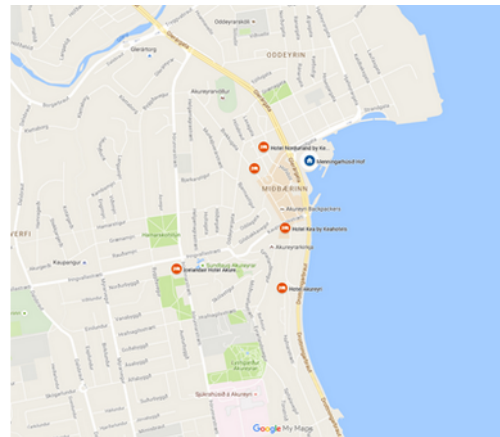

Venue

The IMAGE final conference will be held in
HOF, Cultural Center,
Strandgata 12, Akureyri,
North Iceland,
October 4-5, 2017.
